PRASHANT PANDEY

Frontend Engineer | React.js • Next.js • Admin Systems & Product UI • Performance Optimization

Frontend Engineer with 4+ years of experience building scalable web applications across admin systems and user-facing products using React.js, Next.js (SSR/SEO), JavaScript, and TypeScript. Specialized in developing data-driven admin dashboards, as well as product-focused interfaces and interactive user workflows, handling large datasets with optimized rendering and performance improvements (~30% reduction in re-renders). Experienced in real-time data handling (polling, WebSockets), REST API integration, and secure RBAC-based architectures, with a strong focus on performance, usability, and scalable frontend design.

WORK EXPERIENCE

Frontend Engineer

Sep 2021 – Present
Noida (Hybrid)

Wipro Limited

Tech Stack: React.js, Next.js, TypeScript, JavaScript, Redux, React Query, REST APIs, MUI, Tailwind CSS

- Built and scaled data-driven admin and user-facing applications handling large datasets (10k+ records) with advanced filtering, sorting, and pagination.
- Developed interactive UI workflows and product features for content discovery, user engagement, and real-time data updates.
- Optimized rendering performance using React.memo, useMemo, and efficient state management, reducing unnecessary re-renders by ~30%.
- Implemented real-time data handling using polling, ensuring consistent UI updates for long-running operations and background jobs.
- Designed reusable component architecture for dashboards, content feeds, and user interaction systems, improving development efficiency and UI consistency.
- Integrated REST APIs using Axios interceptors and token-based authentication, ensuring secure and scalable data flow.
- Implemented RBAC (role-based access control) with route guards to manage permission-based UI rendering.
- Designed data-fetching strategies (polling vs WebSockets) based on system requirements, balancing performance and complexity.
- Collaborated with backend and product teams to deliver end-to-end, user-centric features across multiple modules.

PROJECTS

Masterverses Platform (Learning & Content Product)

Wipro Limited | Feb 2024 – Mar 2026

- Built frontend for a user-facing learning and content platform (Udemy-like) with course/event discovery and personalized dashboards.
- Developed engagement-driven UI features including course browsing, progress tracking, and activity feeds.
- Integrated REST APIs to manage content delivery, user activity, and interaction workflows.
- Implemented reusable components for content feeds, filters, and progress indicators, improving UI consistency.
- Rendered user-specific data (progress, engagement, activity) with efficient state updates.
- Focused on improving user experience, discoverability, and interaction flow across the platform.

Tech Stack: React.js, TypeScript, REST APIs, MUI, Tailwind CSS

Data Migration Platform (System + Workflow UI)

Wipro Limited | Nov 2021 – Nov 2023

- Built UI for multi-database data migration to BigQuery, enabling users to configure complex data pipelines.
- Designed dynamic forms for database selection and migration parameter configuration.
- Implemented real-time job tracking using polling, displaying logs, progress, and failure states.
- Developed UI for monitoring workflows, retry mechanisms, and error handling, improving usability of complex systems.
- Optimized UI for continuous data updates and large-scale job monitoring.

Tech Stack: React.js, TypeScript, REST APIs

GeoScope Country Explorer (Public Product App)

- Built a public-facing Next.js application with SSR, improving SEO and discoverability of country data pages.
- Implemented dynamic routing (/country/[id]) for scalable navigation and structured content delivery.
- Developed debounced search, filtering, and sorting features, enhancing performance for large datasets.
- Used React Query (TanStack Query) for caching and background updates, reducing redundant API calls.
- Optimized images using next/image, improving load performance and user experience.
- Designed UI with focus on fast search, usability, and clean interaction flows.

Tech Stack: Next.js, TypeScript, React Query, Tailwind CSS

InfluencerAI Platform (AI Product UI)

- Built frontend for an AI-powered content generation and publishing platform.
- Designed workflows for content creation, preview, and automated publishing.
- Developed UI for AI-generated media, user interaction, and publishing status tracking.
- Integrated APIs to manage AI workflows and content pipelines.

Tech Stack: React.js, TypeScript, REST APIs, Generative AI

TECHNICAL SKILLS

Languages
TypeScript, JavaScript (ES6+)

Frontend Development
React.js, Next.js (SSR/SSG), React Router DOM

State & Data Management
Redux, React Query (TanStack Query), React Context API

UI & Design Systems
Tailwind CSS, Material UI (MUI), Ant Design, Bootstrap

Forms & Validation
React Hook Form, Formik, Yup, Zod

Data Visualization
Recharts, Chart.js

API & Integration
REST APIs, Axios, WebSockets, Polling, SSE

Authentication & Security
JWT, OAuth2, RBAC, Route Guards

Tools & Workflow
Git, GitHub, Jira

AI & LLM Tools
OpenAI, ChatGPT, Codex, MCP

EDUCATION

M.Tech
Birla Institute of Technology And Science, Pilani (BITS Pilani)
2021 – 2025 • Online Learning

Bachelor of Computer Application
GLA University, Mathura
2018 – 2021

Intermediate
Adarsh Inter College, Mathura
2018

High School
Adarsh Inter College, Mathura
2016

ACHIEVEMENTS

- Microsoft 365: Copilot Chat Explorer
- DP-900 Azure Data Fundamentals - Udemy
- Git Complete: Step-by-Step Guide to Git
- ReactJS: From Zero to Hero

LANGUAGES

English	Full Professional Proficiency
Hindi	Full Professional Proficiency
